

Integrated Environmental & Quality Policy

IBS Technology has decided to develop and implement at its headquarters an Integrated Quality and Environment Management System compliant with the reference standards UNI EN ISO 9001: 2015 and UNI EN ISO 14001: 2015.

IBS Technology, which has always been sensitive to issues concerning quality and environmental aspects, has decided to integrate the two systems with a view to improving their performance, committing to invest resources to guarantee a process of continuous improvement of its environmental and quality performance, an indispensable condition for being able to speak of an "integrated policy".

IBS Technology is committed to ensure compliance with the existing laws and all other applicable requirements and to guarantee the continuous improvement of its environmental and quality performance through:

- Establishment of a relationship with the Customers that allows the clear identification of the product requirements and the continuous perception of the level of satisfaction of the Customers themselves;
- Proposal of innovative solutions to customers to improve products and related services;
- Consideration of all suppliers as determinants for the quality of the product and therefore essential factors for customer satisfaction.
- Constant control and maintenance of systems and equipment in use;
- Staff awareness and training, at various company levels for the reduction of environmental impacts deriving from the activities of the Organization, in order to be aware and responsible in the field of environmental management and occupational safety;
- Choice of products that are less polluting and less dangerous both for environmental protection and for the health and safety of human resources;
- Control of water and energy consumption, as well as of emissions into the atmosphere;
- Optimization of the waste cycle;

The objectives for the Integrated Management System are kept constantly under control and distributed internally to the Organization, in order to make aware all the human resources.

The Company Management is committed to communicate the Integrated Policy to all interested parties and to review it periodically.
